                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               source
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Clone distribution: MGC clone distribution information can be in through the I.M.A.G.E. Consortium/LLNL at: http://image.llnl.gc. Series: IRAK Plate: 182 Row: f Column: 6 This clone was selected for full length sequencing because it passed the following selection criteria: Hexamer frequency ORF analysis, Similarity but not identity to protein.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Direct Submission

                                                                                                                                                                                                                                                                                                                                                                                                                                                                          BBSRC/Dundee/Nottingham/Sanger/Sheffield/UMIST cDNA collection, from a library constructed by Elizabeth Bosch. cDNA was prepared from RNA extracted from muscle, normalised, and poly A-trimmed. ECORI-NotI cut cDNA was then ligated into the vector. Vector: pBluescript II KS(+); Site_1: EcoRI; Site_2: NotI Host: Escherichia
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      sequencing project.

The protein may also have proliferation/differentiation, stem cell growth factor, haematopoiesis regulation, immune stimulating or suppressing, chemotactic/chemokinetic, haemostatic and thrombolytic, receptor/ligand, and antiinflammatory activities. The cDNA sequences of the invention are useful for expressing recombinant protein for analysis. The present sequence represents a novel human cDNA sequence of the invention, this sequence is an expressed
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Sequence 1416
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           This invention relates to the cDNA sequences encoding an isolated nove human polypeptide. The protein encoded by the nucleic acid of the human invention is useful for treating central and peripheral nervous system invention is useful for treating central and peripheral nervous system.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Claim 1; Page; 612pp; English.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  disorders, coagulation disorders, and
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Novel polypeptide useful for treating neurodegenerative diseases, myeloid or lymphoid cell disorders, bone disorders, mechanical and traumatic
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Tang TY,

New isolated nucleic acid encoding MP-1 protein, useful for preventing, treating, or ameliorating diseases associated with aberrant metalloproteinase activity, e.g. immune, metabolic, inflammatory and
                                                                                                                                                                                                                        WPI; 2002-723329/78 P-PSDB; ABG96487.
                                                                                                                                                             Disclosure; Page 462-463; 473pp; English.
                                                                                                                                                                             neurological disorders.
```

an

amystrophic lateral sclerosis (ALS), its juvenile form or an ALS-like condition. The compositions and methods are also useful for diagnosing, prognosticating, treating, ameliorating and/or treating disorders associated with Mp-l activity, e.g. diabetes, cancer, reproductive disorders (e.g. Kleinfelter's syndrome, genital warts, or germinal cell aplasia), metabolic disorders (e.g. premature puberry, Kallman syndrome, or Cushing's syndrome, neurodegenerative diseases (Alzheimer's disease, Parkinson's disease, Huntington's disease or Tourette syndrome), liver and renal diseases and immune disorders (e.g. AIDS, rheumatoid arthritis or sepsis), pulmonary diseases (e.g. pneumonia, emphysema or cystic fibrosis) and vascular, inflammatory and neurological disorders (e.g. AIZheimer's disease or Parkinson's disease). This sequence represents a Alzheimer's disease or Parkinson's disease). metalloprotease (MP-1). (I) is useful for preventing, treating, or ameliorating a medical condition, particularly an immune disorder, aberrant glutamate transport or motor neuron disorder, such as The invention describes an isolated nucleic acid molecule (I) encoding metalloprotease (MP-1). (I) is useful for preventing, treating, or metalloprotease MP1 polynucleotide

The present sequence encodes human O-sialoglycoproteinase-like protein (OSGPLP). The present invention also describes: (1) the preparation of the OSGPLP protein; (2) applying the OSGPLP protein in diagnosis; (3) the prevention and/or treatment of related diseases; (4) utilising the OSGPLP protein in screening its agonist, excitomotor and inhibitor and preparing an antihody against the OSGPLP protein; and (5) the use of the OSGPLP polynucleotide sequences, proteins, agonists, excitomotors, inhibitors and antibodies in treating diseases related to the abnormal OSGPLP gene and in preparing the medicine composite for the treatment

2002-723329/78. DB; ABG96478.

New isolated nucleic acid encoding MP-1 protein, useful for preventing, treating, or ameliorating diseases associated with aberrant metalloproteinase activity, e.g. immune, metabolic, inflammatory and neurological disorders.

Fig 1A-C; English.

CC aberrant glutamate transport or motor neuron disorder, such as CC amyotrophic lateral sclerosis (ALS), its juvenile form or an ALS-like CC condition. The compositions and methods are also useful for diagnosing, prognosticating, treating, ameliorating and/or treating disorders CC associated with MP-1 activity, e.g. diabetes, cancer, reproductive CC disorders (e.g. Kleinfelter's syndrome, genital warts, or germinal cell CC aplasia), metabolic disorders (e.g. premature puberty, Kallman syndrome, CC or Cushing's syndrome), neurodegenerative diseases (Alzheimer's disease, CC Parkinson's disease, Huntington's disease or Tourette syndrome), liver CC and renal diseases and immune disorders (e.g. AIDS, rheumatoid arthritis CC or sepsis), pulmonary diseases (e.g. pneumonia, emphysema or cystic CC fibrosis) and vascular, inflammatory and neurological disorders (e.g. Alzheimer's disease or Parkinson's disease). This sequence represents a CC metalloprotease MP1 polynucleotide The invention describes an isolated nucleic acid molecule (I) encoding metalloprotease (MP-1). (I) is useful for preventing, treating, or ameliorating a medical condition, particularly an immune disorder, an

The invention relates to an isolated polypeptide comprising: any of 28 CC sequences of 48-1256 amino acids; a natural amino acid sequence at least CC 90% identical to the 28 amino acid sequences, 94% identical to a sequence conformation of the 28 amino acid sequences, 94% identical to a sequence of 103 or 267 amino acids, 96% identical to a sequence of 414 amino acids, or 97% identical to a sequence of 242 amino acids, all given in CC the specification; or a biologically active or immunogenic fragment of the isolated polypeptide. The polypeptides and polymucleotides are useful in diagnosing, treating and preventing diseases or conditions associated with the decreased expression of protein modification and maintenance confocules (PMOD), such as cell proliferative diseases (e.g. cancer, catherosclerosis), autoimmune/inflammatory diseases (e.g. cancer, caplepsy), gastrointestinal (e.g. ulcer, cirrhosis), reproductive (e.g. callergies), neurological disorders (e.g. stroke, Parkinson's disease, condometriosis), developmental, vesicle trafficking disorders, and confoculated in assessing the effects of exogenous compounds on the expression of nucleic acid and amino acid sequences of PMOD. The PMOD or its craget polymucleotide and compounds for effectiveness as agonist or attagonist of the polypeptides, or in altering the expression of the capters of the polypeptides. The microarray is useful in monitoring compounds on the expression profiles. This polymucleotide sequence represents the DNA encoding a human PMOD protein of the invention
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Thangavelu K, watch

```
The present invention relates to novel 38650, 28472, 5495, 65507, 81588
CC or 14354 nucleic acid molecules which encode adenosine deaminase, glycocrotease or seven transmembrane domain (77M) receptor family members.
CC Sequences of the invention are useful in diagnosing and treating cancer
CC lung cancer), immune disorders (e.g. selective IgA deficiency, rheumatoid
CC arthritis, diabetes, allergy), heart or cardiovascular disorders (e.g.,
CC hypertension, atherosclerosis, arrhythmias, ischaemic heart disease,
CC myocardial infarction, thrombus) including endothelial cell disorders
CC (e.g. psoriasis, Grave's disease), haematopoietic disorders, brain
CC disorders (e.g. cerebral oedema, Parkinson's or Alzheimer's disease),
CC pain and metabolic disorders (e.g. obesity), liver disorders or platelet
CC (e.g. diagnostic assays, prognostic assays, monitoring clinical trials
CC (e.g. diagnostic assays, prognostic assays, monitoring clinical trials
CC and pharmacogenetics) and prophylactic and therapeutic methods. The
CC cused in order the assays also be used in chromosome mapping, tissue typing and
CC cused in core therapeutic methods. The
                                                                                                                                                                                                                                                                                                                                                                                                                                   New 38650, 28472, 5495, 65507, 81588 or 14354 nucleic acid molecules, useful for diagnosing and treating cancer, immune, cardiovascular, hematopoietic, brain, pain, metabolic, liver or platelet disorders, and in pharmacogenomics.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      08-NOV-2000; 2000US-0246768P
